LIFE

ON THE GREAT CIRCLE

MacLean Hall, MSTC Administration Building, Through the Gates

State Teachers College

Moorhead, Minnesota

MSTC graduates make the final trip across the circle.

..the Circle

Moorhead State Teachers College is built around the Great Circle. At left is Weld Hall, one of the MSTC classroom buildings. At upper right is the campus laboratory school. Other classroom buildings and the women's dormitories follow around the circle to the right.

The Circle itself is a huge lawn, with walks crossing from building to building. It is the crossroads of the campus where almost every student can be found at some time of the day.

Dorms

MSTC maintains three dormitories—Wheeler and Comstock Halls for women and Ballard Hall for men.

Dormitory directors are provided for each of the dormitories, although student councils take the responsibility of dormitory government.

Both single and double rooms are available for dorm residents. Each dormitory has a large lounge for the use of its residents, where visitors may be entertained.

on the campus are...

THE CLASSES

Yes, MSTC students go to classes, too.

The classes are like classes anywhere—exciting sometimes, uninteresting sometimes, tiring sometimes.

What kind of classes are there? Name your subject.

Take the picture at the right, for example. Art students find a variety of activities available at MSTC. Then, looking over these two pages, industrial arts, science and the library.

In addition to the metal working equipment shown at left, the industrial arts department provides work with wood and printing. The industrial arts department takes up the whole of the downstairs section of Weld Hall.

Laboratory and classrooms are available for students interested in any of the sciences. Above, a life science class works on a laboratory exercise with the aid of advanced science student assistants.

MSTC

This is Moorhead—MSTC view. Looking daigonally across the campus, the city of Moorhead and part of the city of Fargo spread out on three sides of the campus.

At upper left is the business section of Fargo. At upper center, Moorhead's business section can be seen.

On the campus itself, the MSTC athletic field and baseball diamond take up the left side of the campus area. At lower center is Ballard Hall, men's dormitory at the college. Below and to the right is Dragon Terrace, where married MSTC students and faculty members make their homes.

On the upper part of the campus is the Great Circle, with classroom buildings and the women's dormitories on the outside edges. MSTC's physical education building and MacLean Hall, administration building, are at the upper left part of the campus. The chimney is part of the college's heating plant.

The two buildings at the center of the campus are Wheeler and Comstock Halls, women's dormitories. Further around the circle to the right of the dormitories stands the college laboratory school, where MSTC students in education do their student teaching. To complete the circle, Weld Hall, MSTC science, music, and industrial arts building, is at the upper right part of the campus.

the college newspaper, Homecoming,
swimming, Sadie Hawkins Day.

INTRA

A strong intramural program makes athletics and sports available to everyone who's interested at MSTC.

In basketball, for example, 12 intramural teams formed a league this winter, with a regular schedule, playoffs, and a championship trophy. More than 120 students played in the basketball program.

In football last fall, four intramural touchball teams formed a

SPORTS

The sports picture at MSTC is a varied one.

Shown on this page are two phases of the basketball program at the college, one intercollegiate and the other intramural. Above is a game between two of the 12 teams in the intramural leagues. At right is a Dragon cager in action against an invading Teachers Conference team.

On the other page, at top, the race is on between members of two opposing intramural touch football teams. In the center is a varsity game in the State College Conference, where MSTC was a co-champion last fall.

At the bottom is one of the college's favorite sports, baseball. MSTC teams have always been good, and the college is a perennial contender for the top spot in the Steve Gorman Trophy League.

add it all

This is it.

In the pages of this booklet, we've tried to give a thumbnail sketch of Life on the Great Circle.

This booklet was published and distributed to raise questions in your mind. It isn't a complete picture. It only shows a little bit of MSTC life. We picked the things we showed because we want you to want to know more.

MSTC is the students' college. Student influence is heard in every part of Life on the Great Circle. The organizations, the government, the dormitory life, departmental budgeting—even this booklet—are all student-organized.

We like life on the Great Circle. We'd like to give every high school student a chance to share it with us. We'd like to have you

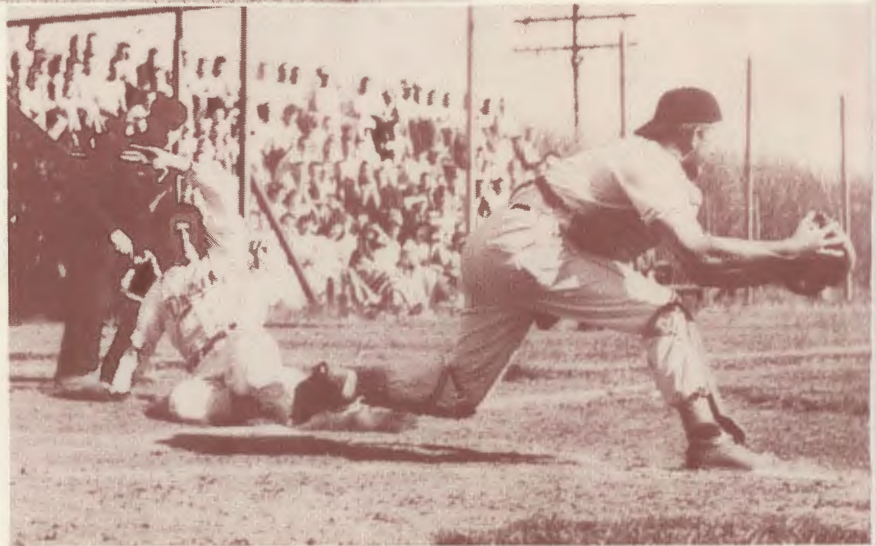

MURALS

league, played out a schedule, and held playoffs.

Intramural softball is planned as one of the spring sports at the college.

The Women's Athletic Association takes care of the sports program for women at MSTC. Basketball and softball are two of the activities for girls.

Classes in golf are offered for students who wish to develop in that sport.

up..

think about the place you'd like to go to school.

There are probably students from your town going to MSTC now. Talk to them. Ask them what it's like. And if you think you might like to know still more, sit down and write a letter.

Thanks for sitting down and reading this booklet. It was written to help *you*.

State Teachers College

... A State College—established in the faith that public education is essential for a society of free citizens—dedicated to the education of public school teachers—staffed with teachers educated in leading universities—providing a curriculum based on the point of view of human growth and development and emphasizing breadth of education for specialization—exercising a religious influence without fostering creedal beliefs.
