SUMMER SESSION - 1932

The New Main Building

SIX WEEKS SESSION — June 13 - July 22
Extension Courses — July 25 - August 25

Entered at the Postoffice at Moorhead, Minnesota, as second class matter.
Series 27 January, 1932 Number 4

THE PLAN OF THE 1932 SUMMER SESSION

The regular summer session at the Moorhead State Teachers College opens Monday, June 13, and closes on Friday, July 22. Following this term, a few extension courses will be offered, primarily for those regularly enrolled on the campus who are working toward their degrees. These courses will begin on Monday, July 25, and close Friday, August 25. Those who take both the courses of the six-weeks session and the extension period are thus enabled to complete a full quarter of work.

The complete schedule of courses for the six-weeks session is printed on the last page of this bulletin. For a description of these courses, the reader is referred to the College catalog, a copy of which will be sent on request. The courses listed for the extension term of five weeks will be given on condition that there are at least twelve students enrolled in the particular course in question.

During the regular session, all students regularly enrolled carry two courses, each of which meets for a double period for four days a week. The same plan is carried out for the extension courses, except that each class meets for five days a week. Each course offered carries four quarter hours of credit, the normal load being eight quarter hours of work.

The wide range of subjects will satisfy the needs and interests of all. The experienced teacher who desires to improve his status, a desirable goal particularly in the present economic conditions, will find professional courses that will reveal present day trends and demands in broader preparation will find many attractive offerings in music, art, and literature.

The courses scheduled may be applied on the requirements of (1) education. One primarily interested in cultural studies as an aid to a the four-year degree curriculum; (2) the two-year standard diploma; or (3) required work for renewal of limited elementary certificates.

THE COLLEGE CAMPUS

Following the dedication exercises planned for the June Commencement this spring, the College will open after a brief vacation with one of the finest physical plants in the Northwest as colleges go. MacLean Hall, with its administration offices, plentiful classrooms and laboratories, and spacious library, will be in full use. The new Physical Education building will afford the most modern facilities in the way of recreation and professional study in this department.

Weld Hall will be used as before the 1930 fire as auditorium, music hall, and for physical sciences and industrial arts. The new Training School will not be in use this summer. With the two dormitories, and the new heating plant, the estimated value of the buildings on the campus is approximately one and a quarter million dollars.

There will also be the usual number of local tours, to include the Fairmont Creamery model farm, the Manchester Biscuit factory, a rabbit and fur farm, the Fairmont creamery, and a tour of the two cities, for which transportation will be provided free with the co-operation of local people.

PROGRAMS OF ENTERTAINMENT

Through the College lyceum committee, entertainments of high artistic merit are being arranged for the regular six-weeks session. In addition a number of lecturers and workers well-known in educational, public welfare, and literary circles will appear on the chapel assembly programs.

THE COACHING SCHOOL

The third annual coaching school, to be held this year August 22 to 27 inclusive, is under the supervision of A. J. Nemzek, Jr., director of athletics. Bernie Bierman, head football coach at the University of Minnesota, Everett Dean, basketball coach at Indiana University, and Dave Woodward, Minnesota trainer, will be guest instructors.

This school is planned as an intensive course not only in coaching, but in various problems which relate to physical education and physical well-being. It is expected that Bierman will present a different technique from that of Tom Lieb and Jack Chevigny, former summer school instructors. Coach Nemzek will direct sessions when interpretations of rules will be discussed.

The new physical education building will provide the very best in the way of demonstration rooms, apparatus, locker rooms, and other equipment. It opens directly on Memorial Field with its track, gridiron, and baseball diamond.

PHYSICAL EDUCATION IN SUMMER SESSION

You are coming to Summer School this year? In these days when the supply of teachers seems to exceed the demand, naturally you are planning to add to your resources and increase your teaching efficiency. But stop and think a moment! Are you planning only for a few more professional credits, a diploma, a degree perhaps? To be sure they are important in one's professional rating, but they are not the only considerations in the advancement of a teacher. Dare you answer, for yourself, a few plain questions? Are you up to par physically, not only well, but brimming over with the joy of living? Do you enjoy, not only teaching, but living with yourself and others? Are you a part of the life of your community? Can you play, as well as work and profit thereby? Can you direct the extra-curricular activities in your school? Do you dread noon and recess duties, or are they a real joy to you?

If you answer "yes" to all of these questions, this bit is not meant for you. You do not need it, for you will be with us as soon as you reach the campus for summer school.

But if your answer is "no", the summer program of the Physical Education department is meant especially for you. We plan to do again those things you have enjoyed in the past, to play tennis in the early morning, to practise archery, to learn the old folk dances and some new ones and dance them too, just for fun. We shall play baseball and "barnyard golf". In our fine new gymnasium we shall spend some hours in really learning women's rules for basketball, so that it will no longer seem just a tame form of a fine game, but a real game in itself.

Would you like to earn a national certificate as a leader for Camp Fire Girls? Do you want material for stunts, some dances for your next operetta, new games for the playground, rural school games? Or do you want to just play and get rested and feel "human" again?

Come and play with us. Activities will be suited to your convenience. If you have credits in Physical Education to make, let us show you how painlessly it can be done. But if credit does not interest you come and play with us as often as you like.

Of course you are tired now, but take our advice, tuck a gym suit, your tennis shoes, your knickers or any other "play clothing" you have into your bag, and don't forget your tennis racquet. Bring it even if you can't play, for there will be others who are learning. When you get here, or before you come, if you like, tell us what you'd like to do this summer and we will do our best to accommodate you.

Oh yes! Did you think that statement was meant for women only? Far from it. We believe that play is most fun when men and women play together. We do that all the year and summer is no exception. If you belong to the "stronger" sex and are afraid of being alone in a class of women, bring another male friend or two with you, and you will be sure of company.

LOCATION OF THE COLLEGE

Moorhead is readily accessible by rail and highway from every direction. Transcontinental lines of the Great Northern and Northern Pacific railways, and a branch line of the Chicago, Milwaukee, and St. Paul connect it with the chief districts, north, south, east and west. National highways ten south, ten north, and seventy-five enter Moorhead from the north, south, and east.

The city itself is a pleasant community of 8,000; across the river is Fargo, chief metropolis of North Dakota; and forty miles to the east is the Park Region lake district, where varied recreational facilities are easily available.

LIVING ACCOMMODATIONS

The College maintains two modern dormitories for women, accommodating one hundred seventy-five. These dormitories are modern, well-furnished, and delightfully cool and pleasant in summer. The charge for both board and room, depending upon the location of the room, is from

\$35 to \$38 for the period of six weeks, approximately \$6 a week. Applications for rooms should be made early to the Dean of Women, Miss Mabel E. Lumley.

The Dean of Women and the Dean of Men maintain a housing bureau which lists off-campus rooms. Rooms in private homes cost from \$6 to \$16 a month. College women who have made no advance arrangements should go directly to Wheeler Hall until such arrangements can be made.

ADMISSION AND CREDITS

The College reserves the right to accept or reject any applicant for admission on the basis of health, character, and fitness for teaching. These are regarded as prerequisites for admission.

Applicants holding a diploma from an accredited high school will be admitted to collegiate courses without examinations, provided they submit a transcript of their high school record. It is desirable to mail this transcript to the registrar prior to registration day, June 13.

Holders of first or second grade certificates will be admitted during the summer term to first year college classes. Professional credits may be earned to meet renewal requirements.

A student may register for eight quarter hours during the summer session in addition to work in Physical Education. The work done in any one course is equivalent to work done in that course during the fall, winter, or spring quarters.

REGISTRATION AND FEES

Registration will begin Monday morning, June 13, at 9:00 o'clock and continue throughout the day. Class work will begin with the first period on Tuesday, June 14. Except by special arrangement there will be no registration after Tuesday. Tuition is free to those who sign, or have signed, the declaration of intention to teach in Minnesota.

For the regular six-weeks session, there is a registration, health, and activity fee totaling \$5. This also covers the loan of required text books. The extension courses to be given in the following five weeks, however, are \$10 each, as are the extension courses given during the winter term. Text books are supplied for these courses as in the regular summer session.

If you desire more complete and specific information about any of the courses listed in the Schedule, write for the general catalog. Inquiries about the state requirements for certification, the Geography Field Tour, the catalog, or room reservations in the women's dormitories should be addressed to:

THE REGISTRAR,
State Teachers College,
Moorhead, Minnesota.

(The schedule of courses is given on the next page.)

SCHEDULE OF COURSES

Summer 1932

8:00 — 9:45

| | |

The New Training School

MOORHEAD TEACHERS COLLEGE STANDARDS

Moorhead State Teachers College is maintained by the State of Minnesota for the training of teachers for the public schools of the state. The institution is a member of the American Association of Teachers Colleges, Class A. Credits earned at Moorhead are accepted by other colleges in so far as such credits meet established requirements.

The various curricula are organized to meet the specific requirements for teachers certificates in Minnesota. All certificates in Minnesota are issued through the State Department of Education and are based on the completion of definite courses of training. Each curriculum is arranged on the basis of (1) constants, (2) variables, and (3) electives.

The variables put the emphasis on one of the following fields:

Elementary—rural, primary, intermediate, upper grades.

High School—junior, senior.

In accordance with this plan, Minnesota certificates of different grades qualify the holders to teach in the elementary school, the junior high school, and the senior high school. Credits earned at Moorhead Teachers College are generally accepted by other states as meeting their requirements for the endorsement or renewal of certificates.

The summer school is cared for by the regular staff. The management of dormitories, the health supervision of the students, and classroom instruction are in the hands of regular members of the college staff.

The New Physical Education Building

TOURS AND FIELD TRIPS

Under the direction of the Geography department a European tour, a field trip to northeastern Minnesota, and a number of shorter tours to points of local interest have been arranged.

The European tour, beginning July 16 at New York City, will include England, France, Switzerland, Italy, Germany, Belgium, Holland, and a ten-day extension to the Scandinavian countries. Under the direction of J. R. Schwendeman, head of the Geography department, a special study leading to campus credit in geography, will be given those who make out a report and attend required lectures. The tour will require 48 days from New York back to New York, this to include the extension to Norway and Sweden. The price of \$412 includes everything except hotel expenses while on the ten-day extension cruise. Transportation, meals, lodging, taxes, and transfers are included in the price.

The ship will be either the Aquitania or the Berengaria of the Cunard lines, and European travel will be under the direction of the American Express company.

Again the College will sponsor a tour of northern Minnesota and Lake Superior, touching on Itasca state park, the Iron Range, and Duluth. This is scheduled for the week-end just before the Fourth of July recess.
