The Industrial Arts Program

The Industrial Arts department with all the new equipment and improvements is an interesting place to work. Visitors are welcome.

For the first time since the war, the MSTC Industrial Arts Department will be open during both summer terms in 1948. Courses in Plastics, Printing, Woodturning and Metal Lathes will be taught by Marlowe E. Wegner.

Recognizing the need of more Industrial Arts education in the post-war world, the Moorhead State Teachers College has purchased much new equipment and machinery for the woodworking, metal, drafting and printing sections, it has increased the teaching staff, it has increased and enriched the course offerings, and it has made the department a pleasant place in which to work by utilizing the energy of color by adopting the "Pittsburgh Color Dynamics" principle and by eliminating glare with the installation of fluorescent illumination in the rooms in which drafting and printing are taught.
