"CLASSROOM IN THE SKY"—

Planetarium A New Adventure For Area Children

By Ellen Mrja

Several thousand area school children, ranging in grades one through 12, have visited the Moorhead State College campus this year to participate in the "Classroom in the Sky" program, a new service being offered through the college planetarium.

The planetarium is more than just a classroom, however; it is an educational adventure for school-aged children, designed not only to instruct but to stimulate.

The facility itself houses a Spitz Space System 512 which projects thousands of stars, the sun, moon, planets and other celestial bodies on a 30-foot dome ceiling. The system makes it possible to reproduce the sky as it appears from any point on earth at any given time, past, present or future.

Special programs have been prepared to add to the scientific knowledge of children. There are currently four featured programs: "Stars of the Season," intended for lower elementary grades; "Seasons and the Solar System," and "The Universe and Space Travel," both suitable for upper elementary and junior high students, and "Mathematics in the Planetarium," designed for junior and senior high levels.

Dr. Warren Thomsen, professor of mathematics, physics and astronomy who was primarily responsible for the creation of the featured programs, believes it is essential that the programs be elementary enough for the students to comprehend and yet stimulating to them educationally.

"Many planetarium shows are too sophisticated for general audiences," he points out. "We try to keep our programs at a simpler level. When the students understand what they are

seeing, they can get excited about it."

Response from area teachers who have brought their classes to visit the planetarium has been very positive. James Ellingson, science instructor for 5th and 6th grades at Probstfield Elementary School in Moorhead, explains how he uses the "Classroom in the Sky" in his curriculum.

"Prior to going to the planetarium, we spent a week and a half on a series of activities which Dr. Thomsen and I

had prepared, such as studying the seasons and the solar systems. "Once at the planetarium, the motivation of the students came through strongly. The program was very meaningful for them, a concrete example of what they had studied in class."

Ellingson and many other area teachers plan to continue using the planetarium for instruction. "The reason we went to the planetarium was to motivate the children," he explains, "And, it worked!"

THE BULLETIN
Moorhead State College
Moorhead, Minnesota
April, 1974

Published monthly, except July, September and December by the Office of Educational Relations, Owens Halls, Moorhead State College, 7th Avenue and 11th Street South, Moorhead, Minnesota 56560. Second class postage paid at Moorhead, Minnesota.

Cover Design by Linda Becker.

"...it was fun to see all the stars and the moon and sun."

"I liked it when the ball went around and it looked like we were going around."

"I liked the dragon, the big bear and the little bear the best."

Photos By Mary Jo Ydstie

Steven Hegrane

Hegrane Heads Student Senate

Steven Hegrane, a junior from Moorhead, was elected president of the Moorhead State College Student Senate in an annual campus student election held Feb. 12.

Hegrane, 24, has an individualized major in student personnel services at MSC. Along with his new presidential duties, he serves as advisor to the Sigma Tau Gamma fraternity, New Student Orientation Committee and as liaison between campus fraternities and the vice-president of the Student Affairs Office.

Hegrane has previously attended Concordia College in Moorhead and the University of Vienna. His wife, Colleen, is director of Dahl Hall, a dormitory on the Moorhead State Campus.

Recent Graduate Teaching In Moscow

Miss Nancy Jo Swanson, a 1973 graduate of Moorhead State College, has accepted a teaching position at the Anglo-American School in Moscow, Russia.

In her new job, Miss Swanson teaches art to children in grades one through eight. Most of the children's parents are diplomatic officials at the U.S. Embassy in Moscow.

Miss Swanson is living with the James Collins family in Russia as a governess to the Collins' two sons. Collins works for the State Department as an official to the U.S. Embassy in Russia.

Miss Swanson met the Collins family while working through an internship last spring quarter at the Minnesota Museum of Arts and Sciences in St. Paul. She graduated from Moorhead State College last summer with an art major.

Dr. Glaydon Robbins To Retire After 25 Years At MSC

Dr. Glaydon D. Robbins, who has held major administrative assignments at Moorhead State College for 25 years and currently serves as Dean of the Faculty for Professional Studies, has announced his retirement, effective July 1.

Following experience as a teacher and administrator in both high schools and colleges, Dr. Robbins came to Moorhead State in 1949 to serve as director of the Campus Laboratory Grade and High School, chairman of the education department and a teacher in that department. In 1953, he was named fulltime chairman of the education department, a post he held until 1970. He was also dean of graduate studies prior to assuming his present position.

Dr. Robbins has served as chairman of commissions on teacher education and professional standards for both the Minnesota Education Association and the National Education Association and as a member of numerous accreditation visitation teams for the National Council for Accreditation of Teacher Education.

He served as president of the National Organization of State Teacher Education and Professional Standards Commission, 1955-56, and as chairman of the NCATE Accreditation Team and Evaluation Board, 1971-72.

Dr. Robbins chaired an MEA committee that drafted and worked for eventual adoption by the 1967 Minnesota Legislature of a state law creating a state professional standards and ethics commission. For 15 years, 1952-1967, he was a member of the MEA's Board of Directors and executive secretary of MEA's Western Division.

For a number of years he was a member of the Minnesota State Advisory Committee on Teacher Education of the State Department of Education, and formerly served as chairman of the American Association of Colleges for Teacher Education Task Force on Teacher Standards and Licensure Legislation and as a member of the Minnesota Comprehensive Educational Manpower Study Advisory Committee.

During 1960-61, he was awarded a \$5,000 Kappa Delta Pi International Fellowship for a post-doctoral study in

Dr. Glaydon Robbins

England and Wales on teacher educational and professional standards. A book based on this study was published in 1963. He is co-author of two other books and author of numerous articles for both general-circulation magazines and professional periodicals.

His active career has included many public and civic assignments, including five years as chairman or secretary of the Moorhead City Charter Commission. He also served seven years as a member of the Northern Intercollegiate Conference and is a past president of that association.

New Spring Program Set At Planetarium

A new public program emulating an interstellar journey through space is being offered at the Moorhead State College Planetarium during the spring quarter.

Entitled, "Across the Sea of Stars," the program is shown at 8:15 p.m. Thursdays through Saturdays and 2 p.m. on Sundays.

The show has been written, produced and directed by Mary Jane Butler of Moorhead, a senior who is studying for an individualized major in astronomy. She is a 1969 graduate of Shanley High School, Fargo.

NEW LOOK AT THE '30's—

"Great Depression" Special Summer Programs Theme

"The Great Depression: A New Look at the '30's," is the theme for special programs at Moorhead State College this summer as part of the regular summer sessions.

The college will also offer a broad range of courses in most academic areas, as well as numerous workshops, during the two five-week sessions, the first session from Monday, June 10 to Saturday, July 13, and the second from Monday, July 15 to Friday, August 16.

An Old-Fashioned 4th of July celebration for college and community also will be continued this year, according to Dr. William Jones, dean of arts, humanities and communications and director of summer sessions. The celebration last year was attended by more than 1,000 people of all ages and featured activities and events associated with celebrations of former years.

Special courses relating to the depression years are the second in a series of programs which the college has planned leading to the nation's 1976 Bicentennial. Four subject areas, relating to The Great Depression, are planned, each running for 11 days.

"The Golden Age of Film," a study of significant films of The Great Depression, will be taught by Ted Larson of the Moorhead State College Speech Department, June 11-25.

This will be followed from June 26-July 12 by "Lessons from the Depression: A National and International View." Four depression-related topics are included: the U.S. response to the depression, the rise of totalitarianism, U.S. response to expanding fascism, and changing Western culture and values of the Thirties. The instructor of this course will be Dr. Lee Grugel, associate professor of history at MSC.

Dr. Roland Dille, president of Moorhead State College, will teach a course on "Depression Novelists," July 16-30. This course will examine some of the literature written during and about the depression.

"Lessons from the Depression: A Regional View," is scheduled August 1-15 and will include study of the impact of the depression on politics, economics and culture in the tri-state area. This course will be taught jointly by Dan Rylance, curator of the Chester Fritz

Library at the University of North Dakota, and Dr. Jerome Tweten, professor of history at the University of North Dakota.

All courses will meet daily from 1:30 to 3:45 p.m., and each offers three credits. Standard tuition rates will apply.

Eight public lectures on depression-

related themes also are scheduled for evenings of dates to be announced later.

A summer booklet, pre-registration forms and additional information about the 1974 special programs and regular summer courses can be obtained by writing to Summer Sessions, Moorhead State College, Moorhead, MN 56560 or calling (218) 236-2762.

22 FROM MSC ARE STUDENT TEACHING ABROAD SPRING QUARTER

The Student Teaching Abroad (STA) program, under the Department of Education at Moorhead State College has made it possible for 230 students to spend fall and winter quarters teaching abroad in 27 different foreign countries. This spring, an additional 37 students are participating in the program — 22 of them Moorhead State College students.

The STA program is open to all students of the Minnesota State College system under Common Market, an agreement which allows them to register for entire academic quarters as Moorhead State College students. Students from private colleges or other states can also participate via cooperative agreement with Moorhead State.

Dr. Howard Freeberg, associate professor of education at Moorhead State, is director of the program.

STA originated five years ago in cooperation with the International Schools Association of Geneva, Switzerland. It primarily places student teachers in private English-speaking schools. However, some students with special language qualifications are assigned to national schools where the instruction is in a foreign language.

"Efforts are made to place the student in a country where he wishes to go," Dr. Freeberg explains, "and which may particularly enrich his academic background, serve his special interests and expand his cultural horizons."

Countries in which Moorhead State college students are teaching this

quarter, the students' names, hometowns and majors include:

AUSTRIA: Kathleen Kolba, Moorhead, Art; Debra Lapinski, Wayzata, Elementary and Special Ed.

COSTA RICA: Tom Avelsgaard, Appleton, Elementary Ed.-Art; Barry Friberg, Lake Park, Elem. Ed.-History; Patricia Friberg, Lake Park, Elem. Ed.-Art; Gary Thompson, Fosston, Elem. Ed.-Coaching.

DENMARK: Roger Griffin, Dilworth, Elem. Ed.-Phy. Ed. and Health; Wayne Gudmundson, Moorhead, Mass Communications.

ENGLAND: Gail Bancroft, Moorhead, Elem. Ed.-Geography; Carol Groven, Oklee, Spec. and Elem. Ed.; Jill Tillisch, Moorhead, Spec. Ed.

GERMANY: Lynne Benke, Dent Elem. Ed.-Psychology; Kathy Forberg, Thief River Falls, Elem. Ed.-Music; Jill Larsen, Moorhead, Elem. Ed.; Norman Vanderpan, Moorhead, Elem. Ed.

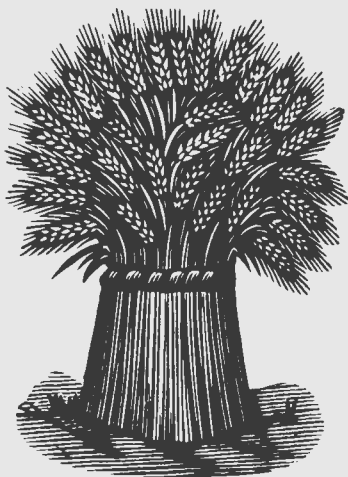

ISRAEL: Gary Rosen, St. Paul, Elem. Ed.

SPAIN: Debbie Gervais, Moorhead, Elem. Ed.-Spanish; Victoria Greseth, Appleton, Elem. Ed.-Remedial Reading; Debra Jacobson, Moorhead, Elem. Ed.; Ginger Kuchera, Wyndmere, N.D., Elem. Ed.

SWITZERLAND: Krista Peterson, Fergus Falls, Elem. Ed.-Remedial Reading.

REPUBLIC OF ZAIRE: Paul Stowman, Rothsay, Instrumental Music.

Beginning June 10, another Moorhead State College student, David Carlson, Robbinsdale, will begin teaching in England under the STA program.

Are you a:

- student who wants to create your own personalized major, one that is tailor-made to include the courses you consider relevant to your personal goals?
- a housewife or businessman who has always dreamed of obtaining the college degree you never received?
- a Minnesota resident who wishes to enroll in a major offered only in a North Dakota university, but could not afford to do so because of the expense of paying out-of-state tuition?
- a high school graduate confused as to your future plans?

The Package

If you find yourself in any of these situations, Moorhead State College has an educational program to fit your needs: the Individualized Major Program, the External Studies Program, the Moorhead State College-North Dakota State University Exchange Program and the New Center for Multidisciplinary Studies.

non traditional studies

Currently in its second full year of operation, the Individualized Major Program at Moorhead State College is becoming increasingly popular among students. Dr. Robert Hanson, vice president of Academic Affairs, believes flexibility is the greatest advantage of the program.

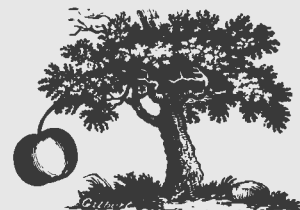

"The Individualized Major allows the student freedom of choice," he explains. "With the help of his adviser and dean, the student can develop his own personalized major. This program is designed for the student who has some vocational or intellectual goal in mind that is not currently in our catalogue."

Approximately 100 students are in the Individualized Major Program this fall. A sampling of the diverse majors which have been approved include: criminal justice, society and human relations, student personnel services, psychology of human relations, child development and family relations, international trade, intercultural studies, visual design for the performing arts and astrophysics.

ADDED DIMENSION

There are few requirements specified in the program. Besides the basic general studies requirements, a minimum of 70 credits must be taken in the major with 30 credits from a single department. At least 70 credits must be earned in upper-division courses.

Dr. Hanson believes the program to be of particular service to those students who wish a major in an emerging career. "The Individualized Major does not harm our traditional majors in any way," he stresses. "Instead, it gives an added dimension to Moorhead State College."

EXTERNAL STUDIES

Beginning in the fall of 1973, MSC has opened its Individualized Major Program to adults who have been wishing for an opportunity to obtain a degree they may want or need in a field of interest. Called the External Studies Program, this new innovation offers adults a chance to obtain college credit through opportunities and resources "externally" or off campus.

Dr. Catherine Warrick, director of Non-Traditional Studies at MSC, explains, "The External Studies Program assumes that adults who wish to continue their formal education have a clear notion of their goals. It further assumes that they are willing and able to assume responsibility for planning and developing their individualized programs of study."

Guidelines in obtaining either a B.A. or B.S. degree are few and the variety of methods that can be used in reaching academic goals are virtually unlimited.

The student must maintain a 2.0 grade point average and complete 192 quarter credits or the equivalent. General education requirements must be met, the individualized area of concentration must be designed and completed in addition to two or more area studies (16 credits each) that are not part of the concentration.

ABILITY AND SKILL

Throughout the program, a portion of the work may be taken on an independent study basis or in reliance on resources external to the MSC campus. "Much stress is placed on analytical ability and skill in communicating as being essential characteristics of an educated person," according to Dr. Warrick.

1-2-3-4

Under the newly expanded Moorhead State College-North Dakota State University Exchange Program, Minnesota residents can now take the first three years of several major programs offered at NDSU while being registered as MSC students. During these first three years, a student pays in-state tuition while pursuing degrees in the areas of architecture, agriculture, engineering, home economics and pharmacy at NDSU.

Diverse ★ Majors

At the beginning of the fourth year, the student transfers to NDSU, paying out-of-state tuition for his final year of study only. The single exception is pharmacy where only two years can be spent in residence at MSC.

Dr. William Jones, MSC director of the Exchange Program, points out the obvious financial advantage of this agreement. "The Exchange Program provides a remarkable opportunity for Minnesota residents to obtain low cost, high quality education," he stresses.

Agreed upon in January, 1973, the program currently involves 179 Moorhead State students. Dr. Jones adds that the program has "expanded the entire range of educational opportunities available to Minnesota residents."

The New Center for Multidisciplinary Studies at Moorhead State College specializes in serving those students who want to attend college, but are uncertain as to what career goals they want to pursue.

put students
in charge of
themselves..."

According to Dr. Catherine Warrick, director of Non-Traditional Studies at MSC, "The purpose of the New Center is to put students in charge of themselves. Most people don't have the planning skills needed to be clear about their goals."

Curriculum at the Center is designed to let students develop their own particular educational plans and pursue them at their own speeds. Student goals and interests play an important role in determining the nature and content of courses offered.

The New Center offers AA degrees in accounting, business administration, home economics, industrial technology, liberal arts, marketing and secretarial science. About 120 students are enrolled in the program this year.

An open entrance policy allows any high school graduate to enroll at the New Center with all the rights, privileges and responsibilities of other students at Moorhead State. Interested students may begin work at the New Center at the beginning of any academic quarter.

Biologist Recognized For Bird Migration Research

A Moorhead State College biology teacher has been recognized by the Research Corporation for research work he is undertaking into the age-old question of why birds migrate.

He is Dr. Oscar W. Johnson, whose teaching and research specialities are physiology-histology (tissue structure) and ornithology.

Earlier his detailed interest in birds brought him considerable recognition for research into the microstructure of bird kidneys that has expanded man's knowledge of kidney function and anatomy in all vertebrate animals.

This work led last year to his being named one of 30-some anatomists from throughout the world to the International Committee on Avian (bird) Anatomical Nomenclature, which intends to publish a new volume on avian anatomy within three years.

More recently, the privately-endowed Research Corporation, which annually awards major grants in the fields of chemistry, physics and engineering, awarded Dr. Johnson one of its discretionary grants. These discretionary grants are authorized to help spur research work outside these other three fields which corporation officials believe show promise of new breakthroughs in scientific knowledge.

Dr. Johnson initially became intrigued with migration during a summer visit to Eniwetok in the Marshall Islands of the Pacific in 1970, while there with the aid of grants from the Atomic Energy Commission and the University of Hawaii to further his research on marine bird kidneys.

He says he was amazed to find rather large numbers of a certain type of birds about the islands in mid-summer, when their normal migration habits called for them to be spending the summer in the Arctic, where they breed.

Johnson's studies after his return noted other ornithologists have observed the same phenomenon in many other parts of the world over the years but that little research has been done into the reasons why.

Challenged by this vacuum, the Moorhead State teacher obtained study skins and tissues from some of these Eniwetok birds during a return visit there last summer. He is using these in microscopic studies of reproductive

Dr. Oscar W. Johnson

organs, hormone-producing organs (like thyroid glands) and plumage trying to find some hint of why these birds did not follow their mates to the Arctic for the summer.

Dr. Johnson intends to use his most recent grant monies to purchase such needed laboratory equipment for his research as a device enabling one to study microscopic sections of frozen tissue to aid in greater understanding of the functions of such organs.

If successful, his work may not only answer his immediate questions about the Eniwetok Birds but, in turn, provide spin-off findings that will help man to understand better the mysteries of what controls migration.

Dr. Johnson's first paper dealing with his migration studies and findings to date was published in October by *The Concor*, one of the foremost ornithological journals in the world.

A Chicago native, Dr. Johnson took his undergraduate work at Michigan State University, earned two graduate degrees in zoology at Washington State University and taught at Western State College in Gunnison, CO, before coming to MSC in the fall of 1965.

Dr. Ippolito

Gerald Ippolito, Series Director, Is Dead At 42

Dr. Gerald J. Ippolito, assistant professor of English at Moorhead State College, died February 25 at the age of 42 after a long illness. He was director of the Series for the Performing Arts at the college for the last 12 years.

Dr. Ippolito was born May 30, 1931 in New York City. He attended Brooklyn College, receiving a fellowship to the Shakespeare Institute at Stratford-on-Avon during the summer of 1952 and earning his bachelor's degree with honors in 1953.

In 1955, he was research director for *Bounty*, a New York-based satire magazine, and from 1956-58 edited the British drama magazine, *Encore*. He taught at Newark Preparatory School in New Jersey 1958-59 and came to Moorhead State in September, 1959. He received his doctorate last summer from the University of Birmingham in England.

Dr. Clarence Glasrud, professor of English and long-time friend, described Dr. Ippolito as a natural teacher and a man very close to his students. "He lived his job," said Glasrud, "and was remarkably devoted to the college, the series and his classes."

Dr. Ippolito is survived by his father and stepmother, two brothers and a sister, all of New York.

1974 SUMMER SESSION DATES

First Session:

Session Ends: August 16

SHE'LL GRADUATE IN MAY—

Hibbing Mother Adapts To Coed Life

By Ellen Mrja

Somehow, you just have to admire the woman. After all, it takes a great deal of enthusiasm, confidence and — well, yes — courage for any woman to leave the comforts of a home and job for the hours of study which college demands.

But when you compound all of this by the fact that Mrs. Gertrude Schleicher of Hibbing, Minnesota, chose to live in a college dormitory, completely surrounded by 18, 19 and 20-year old girls, when she came to school at Moorhead State College, you have to applaud her audacity.

The kids do — and they love her. Because the name of the dormitory she lives in is Grantham Hall, the students have affectionately nicknamed her "Grantham Gertie."

"The other students certainly have accepted me," Gertie maintains. "I have gotten acquainted with quite a few and spend a lot of time talking and joshing with them. They really treat me like one of the group," she exclaims.

Gertie's trek to Moorhead State College last summer to complete her bachelor's degree in elementary education is the culmination of years of part-time study that began in 1945.

"At that time," Gertie explains, "I started my normal training in Walker, Minnesota. After I received my one-year certificate, I taught country schools in Otter Tail and Becker counties for five years.

"During the summers," she continues. "I took classes at the University of Minnesota in Duluth until I got my two-year certificate. Then I got my job in Carlton, Minnesota, where I taught fourth grade."

Due to a change in the laws, however, only those who have a four-year degree will be allowed to teach in the future. So Gertie took a one-year's leave of absence from Carlton and came to MSC last summer, 60 credits short of her bachelor's degree.

Gertie admits that it "took a while to get into" studying again but found no serious problems in adjusting to her new life as a co-ed.

"Winter quarter I carried 22 credits and I suspect I'll be making the dean's list with a 3.5 or 3.7 average," she said. At the end of the school year, Gertie will have her four-year degree completed — with credits to spare.

Mrs. Gertrude Schleicher

Advocate Photo By Dave Benning

Then it will be back to her job in Carlton.

In the meantime, Gertie continues to put in a hard week's worth of studies in Moorhead and then travels the four-hour drive to Hibbing every weekend to see her husband, Kermit, and their son, John.

When she arrives at their home every Friday night, "my son always has supper ready for me," Gertie says. "He's taking chef's management at the tech school in Hibbing so he always has something real nice prepared.

"Both my husband and son can cook and clean," Gertie adds, "so there's no

problem there when I'm away at school. But," she laughs, "when I am home on weekends, I have to get clothes ready for them to wear the following week!"

Gertie is thankful for all the support her family and friends in Hibbing have given her. "All six of my sons are as proud as peacocks of me," she says. "They have given me a great deal of encouragement and say they all want to come and see me walk across that stage when I graduate on May 23.

"And," Gertie thoughtfully adds, "I'm really looking forward to that day."

Photos By Mary Jo Ydstie

Curling

The old Scottish sport of curling has been added to numerous recreational activities available at Moorhead State College for both men and women.

Curling is one of several different sports that have been introduced in recent years in addition to the more traditional activities that have always been offered. Some of the other new athletic opportunities offered in the Department of Health, Physical Education and Recreation include self-defense, scuba diving, camping and outdoor recreation, horsemanship and skiing.

The curling class is taught by Mary V. Montgomery, associate professor of health, who views sports and recreation as important to the physical well-being of students. "Exercise adds another dimension to any individual's life," she points out.

Curling is a particularly beneficial sport for women, Miss Montgomery explains, because size and strength are not necessary to curl well.

"I began curling 14 years ago and believe it to be a fantastic life-time sport," she says. "Why, in Canada there are women in their 70s and 80s who continue to curl."

STUDENT INTEREST GROWS IN MINORITY STUDIES

By Ellen Mrja

A new academic department in Minority Group Studies has been established at Moorhead State College as a result of increasing interest in American ethnic minorities in the late 1960's and early 70's. Dr. David Beaulieu, chairman of the department, says the purpose of the program is to "provide information about American Indian, Mexican American and Afro-American minorities concerning their history, culture and experience within American society."

Under the department, a student may earn either a 36-credit minor in Afro-American studies, American Indian studies, and Mexican American studies or a 45-credit minor in Minority Group Studies.

Each minor is essentially an interdisciplinary program. The core of required courses is offered by the Minority Group Studies department itself with the remaining courses drawn from numerous other departments such as education, anthropology, political

science, history and sociology. Dr. Beaulieu sees a unique advantage in this interdisciplinary approach. "By drawing on these other programs and relating them to our own program," he maintains, "we can often make many of them seem much more relevant to the needs of minority group students."

Student interest in minority studies has grown tremendously. Dr. Beaulieu estimates that there are as many as 300 students per quarter in the Minority Group Studies classes.

In addition to their intrinsic value to students, Minority Group Studies courses may also be used to fulfill General Studies requirements and to meet the new teacher certification regulation requiring a Human Relations component in teacher education. "However," stresses Dr. Beaulieu, "the majority of the students are not here because of these factors."

Dr. Beaulieu is optimistic about the future of the program and foresees the possibility of having the Minority Group Studies department offer majors within the next few years.

Dr. T. Edison Smith

Dr. T. Edison Smith, professor of health education at Moorhead State College, has been presented with the Lou Keller Award, the highest honor given by the Minnesota Association for Health, Physical Education and Recreation.

The award recognizes outstanding services and contributions to the HPE&R field.

A Wadena, Minnesota, native, Dr. Smith has been on the Moorhead State faculty since 1949 and is a former athletic director at the college and a past president of the Minnesota HPE&R Association. Last year, he ended four years service as president of the Minnesota Respiratory Health Association. Currently, he is Minnesota's representative on the American Lung Association Board of Directors.

"Your Place" New Student Aid

Students interested in helping fellow students at Moorhead State College have created a new referral center named Your Place. There are currently 17 MSC students who voluntarily devote an average of three hours a week to the cause of helping their peers handle any emotional, physical or legal problems they may have.

Through the services of Your Place, students who clearly need professional help to cope with their problems are referred to such professionals as doctors, lawyers, counselors and health centers. No charge or only a small one is made by the professionals the students use.

The volunteers working at Your Place must pass an extensive training period, in which personal listening skills and determining how and when to use the referral systems are emphasized.

Cindy Goodyear, a junior from Starbuck, Minn., is coordinator of the program and a senior from Moorhead, Kathy Koller, is program developer.

This year's staff include Joe

Neuwissen, Bloomington; Terry Moan, Brooklyn Park; Vicki Kemmer, Colfax, N.D.; Cindy Moe, Crookston; Terrance Hurley, Edgerton; Sharon Johnson and Cynthia McArthur, Fargo, N.D.; Bill Svien, Fosston; Joan Bernard, Hibbing; Mary Larson, Mahnomen; Julie Seifert, Minneota; Jim Kiefer and Calvin Singleton, Moorhead; Patrick McDaniel, Sebeka; and Barb Bullis, Tintah.

Sociology Senior Earns 4-Year Award

Lynn Hart, a Moorhead State College senior, has accepted an offer from the National Institute of Health for a four-year traineeship in methodology.

The traineeship will finance four years of graduate study leading to a doctoral degree which Hart will pursue in the Sociology Department of the University of Wisconsin in Madison.

Hart, a Moorhead High School graduate, is majoring in Sociology.

\$75,000 Available For Scholarships

Scholarship awards totaling \$75,000 are again being made this year by Moorhead State College to high school seniors, community college transfers and upperclass students currently enrolled.

Awards to high school seniors range from \$150 for the Faculty Scholarship to \$300 for the Cum Laude and Presidential scholarships. Cum Laude scholarships are reserved for students of high academic ability. At the end of March, more than 200 awards had been accepted by high school seniors, including 124 Cum Laude, 58 Faculty and 34 Presidential.

The expanded scholarship program was established last year with support from the faculty, the Moorhead State College Foundation and the Alumni Association.

Vincent Murphy

VINCENT MURPHY NAMED TO HEAD MSC FOUNDATION

Vincent R. Murphy, Moorhead, general agent for Connecticut General Life Insurance Co., has been elected new president of the Moorhead State College Foundation.

The Foundation, created in 1969, is a non-profit corporation devoted to receiving public monies and property for the benefit of Moorhead State College.

Others elected to new offices include: R.S. (Dick) Gilderhus, president of Gilderhus Oil, Moorhead, first vice president; William R. Amundson, president of First National Bank, Moorhead, second vice president; Clara Cupler Kornberg, Moorhead, retired MSC instructor, secretary, and Pern Canton, president of American State Bank, Moorhead, treasurer.

Directors of the board, whose terms expire in 1974, include: William B. Dosland, Paul P. Feder, Paul Horn, William Marcil, Denis J. Olson, and David W. Torson.

Directors whose terms expire in 1975 include: Clarence Glasrud, Roderick McLarnan, Henry C. Mackall of Minneapolis, James M. Pasch of Barnesville, Vance N. Thysell and Dennis W. Troff.

Directors whose terms expire in 1976 include: Edwin C. Benedict, M.O. Foss, Jr., Marvin P. Koeplin, Robert Stenerson, Robert H. Tallman and Clifford O. Wold.

All are of Moorhead-Fargo unless otherwise noted.

Enrollment, Academic Trends Aired During Legislative Visit

Enrollment, academic programs, building needs and campus development were major topics for discussion during a winter visit to Moorhead State College by the six-member Education Division of the House Appropriations Committee of the Minnesota Legislature.

Howard Smith of Crosby is chairman of the committee.

During a morning session, Dr. Roland Dille, MSC president, reviewed enrollment figures over a seven year period.

The total number of full-time equivalent (FTE) students — the total number of credits taken by all students divided by 15, the usual full-time credit load — was 5,070 last fall compared to the all-time high of 5,365 in 1970.

In the same time, however, FTE students in continuing education have increased from 71 to 278. The number of new freshmen last fall increased from 989 the previous year to 1,021, and the number of students coming from the seven-county Twin City area jumped from 447 to 524.

More than 500 students, or about 12 per cent of the student body this year, are veterans, Dille said. Moorhead State has a federally funded veterans affairs office which provides counselling, tutorial service and other programs for veterans.

President Dille also reviewed results of a new scholarship program which was established last year with support from the faculty, the Moorhead State College Foundation and the Alumni Association. Over \$70,000 was awarded last year to 335 students, including 210 freshmen, 26 community college transfers and 94 upperclass students. This program is expected to provide scholarships ranging from \$150 to \$300 for as many or more students this year.

The legislative committee was also given a summary of some of the new

educational developments in the past two years.

The New Center for Multidisciplinary Studies, a two-year college within the college, is particularly suited for those who have had difficulty selecting a direction in high school and are very concerned with career examination.

The Tri-College Exchange, a new arrangement with North Dakota State University in Fargo, offers students opportunities to take programs at the other institutions if it is not offered at the home school. Under this exchange, a Minnesota resident may now enroll at Moorhead State, pay in-state tuition and take three of his four years at MSC while taking necessary courses at NDSU. The fourth year is spent at NDSU with out-of-state tuition only for that year. NDSU students have the same opportunity to pursue programs at MSC, paying resident rates for three of the four years.

The legislators also heard plans for the long-range development of the college campus. Earl R. Herring, vice president for administrative affairs, also presented studies showing the need for a fine arts building to relieve overcrowding in the Center for the Arts, and an addition to the maintenance building.

Commencement Scheduled May 23

Moorhead State's 80th Commencement program for graduating seniors and graduate students will be held Thursday, May 23 at 2 p.m. in Alex Nemzek Fieldhouse.

This is the first of two commencement exercises held annually at the college. The summer commencement will be held Friday, August 16.
